10.2 Bilaga 2. Granskningsmall för risk för biasbedömning (baserad på AMSTAR I-mallen)

Steg	1	2	3	4	5	6
Ref	Är kriterier för vad som ska ingå tydliga? (PICO, inklusions- och exklusionskriterier skall vara angivet). Sökningen matchar populationen och interventionen och är väl genomförd och dokumenterad så att den kan återskapas. (AMSTAR 1 + 3)	Studiernas relevans har granskats av två oberoende personer på abstrakt och fulltextnivå och ett konsensusförfarande bör finnas beskrivet. De inkluderade studierna finns angivna. (AMSTAR 2 + 5)	Inkluderade studier är kvalitetsgranskade och kriterier för kvalitetsnivå ska finnas beskriven. Kvalitén, karakteristika och resultat på de respektive inkluderade studierna framgår tydligt och finns dokumenterade (AMSTAR 6 + 7).	Studierna har vägts samman i metaanalys eller metasyntes på ett korrekt sätt om detta var lämpligt, i annat fall beskrivits narrativt (AMSTAR 9)	Resultaten är evidensgraderade eller beskrivna i slutsatsen där hänsyn har tagits till studiernas kvalitet. I tillämpliga fall bör de även undersökt överförbarhet, samstämmighet, precision och risk för publikationsbias (AMSTAR 8 + 10)	Exkluderade studier finns dokumenterade, likaså författarnas jävsförhållanden. Protokoll för översikten finns. Författarna har angett om alla typer av publikationer omfattades av litteratursökningen. (AMSTAR 1 + 4 + 5 + 11)
